ORTHOCERAS OVAL BOWL

Found in the Atlas Mountains of Morocco, Orthoceras are an extinct Nautiloid cephalopod that lived from the Ordovician Period to the Triassic Period (500 – 200 million years ago). This ancient cephalopod, a relative of the squid, sparks the imagination with its unique, chambered shell. More than decoration, it's a window to a bygone era. Imagine the vast oceans it swam in, the mysteries it holds within its fossilized form. Bring a touch of natural history and a unique talking point to your home. The Orthoceras fossil is a reminder of the wonders of the natural world, past and present.

(w) 26" x (d) 10" x (h) 4"

(w) 66 x (d) 25 x (h) 10 cm
